

Memo

To: Staff Member/Parent or Guardian

From: Clearview Regional School District

Date: May 10, 2010

The United States Environmental Protection Agency is now requiring all school districts to communicate to parents and students any use of pesticides in and around our schools. In compliance with this requirement, the attached Integrated Pest Management Report is being forwarded to delineate the name, location and reason for the use of a pesticide on school grounds. Also indicated are the common adverse reactions to the pesticide as outlined on the Material Safety Data sheets for the particular pesticide.

Each time a pesticide is used throughout the year, you will receive additional information.

Should you have any questions, please contact the building principal or visit the following website <http://www.epa.org/pesticides/ipm/index.htm>.

Sincerely,

Esther R. Pennell
Business Administrator
